

The Scala FP-950-4 is a high-gain, 4ft. full- parabolic antenna used in broadcast and communications systems around the world.

- High front-to-back ratio for point-to-point relay system applications, as well as FM STL systems.
- Fabricated from high grade aluminum, with fully welded elements and heavy duty back plate assembly, plus stainless steel hardware and fastenings.
- Foam filled broadband feed assembly requires no pressurization and can be easily replaced if necessary.
- FP-950-4 meets FCC Part 101.115 category B requirements
